

MEACHAM PARK DEMONSTRATION SUMMARY REPORT

LOCATION

Milwaukee & Meacham, Orleans & Meacham, and Milwaukee & Alsobrook

DURATION

November 11 – December 2

DEMONSTRATION COMPONENTS

Temporary pavement striping, paint, and cones were used to narrow down driving lanes to slow traffic and raise awareness of pedestrians.

EVALUATION

Speed data was observed near the three different demonstration locations in the Meacham Park neighborhood prior to, during, and after the demonstration projects were installed. Based on this data, the projects caused little-to-no reduction to vehicle speeds. If the City intends to install permanent traffic calming in these areas in the future, different and/or more significant measures will need to be considered.

		1 Week Prior to Demonstration	During Demonstration
Milwaukee & Meacham Average Speed (MPH)			
	Northbound	28	29
	Southbound	27	31
Milwaukee & Meacham 85th Percentile Speed (MPH)			
	Northbound	34.4	35.8
	Southbound	32.1	38
Milwaukee & Alsbrook Average Speed (MPH)			
	Northbound	30	29
	Southbound	32	32
Milwaukee & Alsobrook 85th Percentile Speed (MPH)			
	Northbound	35.6	35.2
	Southbound	39.2	40
Orleans & Meacham Average Speed (MPH)			
	Northbound	*	28
	Southbound	29	28
Orleans & Meacham 85th Percentile Speed (MPH)			
	Northbound	*	35.1
	Southbound	36.9	33.6
